Management is responsible for the preparation and fair presentation of this condensed consolidated interim financial information in accordance with International Accounting Standard 34 Interim Financial Reporting (‘IAS 34’). Our responsibility is to express a conclusion on this condensed consolidated interim financial information based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information is not prepared, in all material respects, in accordance with IAS 34.

The Group measures the allowance for expected credit loss for trade receivables at an amount equal to lifetime ECL. The expected credit loss on trade receivables are estimated using a loss rate, with reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. The expected credit loss on trade receivables is AED 16,937 thousand as at 31 March 2026 (31 December 2025: AED 16,937 thousand).

Trade and other receivables include AED 602,076 thousand (31 December 2025: AED 434,266 thousand) due from related parties (note 10).

The Group has adopted a policy of dealing with only creditworthy counterparties. Adequate credit assessment is made before accepting an order for sale of services or goods from counterparty.

8 Contract assets

Contract assets mainly represent balances due from customers for software development, installation and support service contracts that arise when the Group recognises revenue from customers in line with a series of performance related milestones.

The group will previously have recognised a contract asset for any work performed. Any amount previously recognised as a contract asset is reclassified to trade receivables at the point at which it is invoiced to the customer. Payments are usually not due from the customers until either the services are complete or the respective milestones are achieved and therefore a contract asset is recognised over the period in which the services are performed to represent the Group's right to consideration for the services transferred to date. All the contract assets that are expected to be realised within one year are classified under current assets.

The expected credit loss on contract assets is AED 3,067 thousand as at 31 March 2026 (31 December 2025: AED 3,067 thousand).

Carrying amount of contract assets is as follows:

	31 March 2026 AED'000 (unaudited)	31 December 2025 AED'000 (audited)

On 11 February 2025, the Ministry of Finance (MoF) of the United Arab Emirates (UAE) released Cabinet Decision No. 142 of 2024 on the Imposition of Top-Up Tax on Multinational Enterprises (Cabinet Decision), introducing a Domestic Minimum Top-Up Tax (DMTT) on multinational enterprises (MNEs), which is applicable from 1 January 2025. The Pillar Two regime recently adopted by the United Arab Emirates (UAE), will significantly influence the tax landscape for multinational enterprises. This regime, introduced as part of the OECD's efforts to address base erosion and profit shifting (BEPS), imposes new global minimum tax standards. The Group calculates income tax expense using the tax rate that would be applicable to the expected total annual earnings. The Group has recognised an additional top-up tax expense to ensure compliance with 15% global minimum effective tax rate.
